PROFESSIONAL SUMMARY

Frontend Developer who bridges performance engineering and motion design, 3+ years delivering accessible, production-grade web applications for 10+ clients using React.js, Next.js, and TypeScript. Rare combination of Core Web Vitals optimization and purposeful GSAP and Framer Motion animation, with a strong foundation in modern CSS architecture and WCAG 2.1 standards. Seeking a full-time role to bring that same balance of speed and craft to a collaborative product team.

WORK EXPERIENCE

Lead UI & Frontend Consultant

Independent Consulting | January 2026 – Present

- Directs the end-to-end technical strategy and architectural vision for high-stakes client projects, leading Vite-to-Next.js migrations that elevated performance scores to 95+ while mentoring cross-functional teams on modern CSS standards and performance engineering.

Frontend Developer

Freelance Client Work | August 2022 – October 2025

- Architected scalable, performance-first interface systems for 10+ clients by leveraging advanced native Web APIs and modern CSS (native nesting, @layer), successfully eliminating technical debt and delivering production-grade web applications that exceed industry accessibility and SEO standards.

PROJECTS

UCV Lawyers Website

Vite • Modern CSS (Scoped, Logical Properties) • TypeScript • PHPMailer

- Built a strictly WCAG-compliant booking platform using React and TypeScript, increasing inquiry completion rates by over 50% by streamlining the experience for non-technical clients.
